This course helps you understand how GIS and spatial methods could be utilized to analyze the complex interactions among society, environment, and population health. It will use real-world applications such as environmental exposure and mobile health to highlight principles, methods, and techniques of Medical/Health Geography.

Semester: Spring 2015
Time: Tuesday/Thursday
9:10am-10:30am
Location: OSH 215

Instructor: Neng Wan
Assistant Professor
Department of Geography
University of Utah
